Chafing Fuels | Tealight Candle | Liquid Candle

## 公司简介 Group Introduction

Canahot has been serving foodservice industry over 25 years. In 1997, we set up our own factory in Wuxi, Jiangsu Province, mainly produce chafing fuels for catering heating, and fire gel for all kinds of fireplaces and firepots. As first manufacturer of chafing fuel in China, we have excellent developing groups, advanced equipments and technology, rich experience, and mature production.

Canahot Industrial is ISO certified and guarantees efficiency, quality control and reliability with customer's service second to none. Our passion has always been developing a high quality product that is safe, reliable and innovative. Our products now are popular and widely used in hotels and restaurants, and well received by both domestic and oversea customers.

## Canahot Wick Chafing Fuel

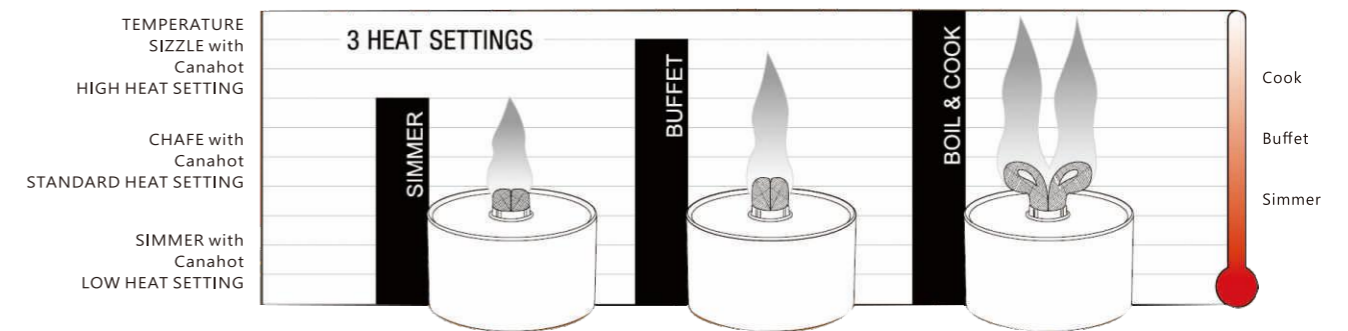

- 在您的自助餐厅使用安和产品, 会使产品温度与你的热情服务相得益彰!

## Canahot Adjustable Wick Chafing Fuel

### The Perfect Solution from Simmer to Sizzle

### 从文火到旺火的最佳选择!

### INSTRUCTIONS FOR USE

|  |  |  |
|--|--|--|
| <br>Factory Standard Set    | <b>STANDARD HEAT</b> An ideal heat for most service functions. Factory set for use in chafing dishes, holding carts, and most warming devices. Simply remove the cap and light. Requires no adjustment. Burns up to Six hours. Saves on labor. Lasts through the entire buffet.  | <b>STORE AND REUSE</b>   |
| <br>Pull up and Spread Wick | <b>HIGH HEAT</b> Cook food and boil water. Before lighting, grasp wick between fingers. Gently pull up wick until the wick stops. Spread the wick loops and then light. Cartridge burns three hours in the setting. Ideal for hot pot service or where very high heat is needed. |  |
| <br>Push Wick Down          | <b>LOW HEAT</b> For low temperature food and beverage warming. Will not scald coffee. Warm sauces without pudding type crust. Before lighting, gently grasp wick between fingers and push down. Burns up to eight hours. Perfect for room service and delivery boxes.            |  |
|  |  | To extinguish, blow out flame or use a metal snuffing device.<br><br>Store for later use, The fuel will not evaporate.<br><br>To relight, blot wick with towel or napkin, then relight.<br><br>Dispose of cartridge only when empty. |

*There's no need to change the fuel during the buffet.  
Keep the food in the pan, Canahot does the rest!*

## Canahot Fire Gel

Canahot Fire Gel, used for all gel fireplaces and burners. It is made from the purest ingredients, to produce a quality, clean burning, smokeless, and odorless gel. It has a rich yellow flame during burning, to create a warm and romantic atmosphere.

## Canahot Fire Gel

Bottles or tins? You can use tins in most gel fireplaces and firepots, and refill them when needed with our 1 liter refill bottles.

CNH-360AN Canahot Fire Gel, 369g/pc, 24pc/ctn, 2 hour burning  
 CNH-800AN Canahot Fire Gel, 800g/pc, 16pc/ctn, for refill use

### How to Use

Simply place the gel can where you would like it to go and remove the lid. Light the gel and leave the tin in place. One can will burn approximately 2 hours. To extinguish the flame. Place the lid over the fire and this will snuff it out. Once the fire gel is finished, the tin can be reused.

If you are using the gel to start a fire, simply scoop some of the gel out of the can, and put it in place and then set alight. Add the logs or charcoal to build the fire.

## Canahot Fire Lighter

### Fire Lighter Gel

It is environmentally safe, burns odor-free and smokeless. It can even be used for direct cooking(Roasting grilling).

#### How to use

Squeeze required amount of gel out of the tube either on a suitable base or directly on the material to be burned and ignite.

When used as a firelighter, apply required amount at the base of the charcoal bricks or wood pile. When required more fuel, can be added to the fire directly from the tube.

CNH-220B, 220g/pc, 30pc/box, 1box/ctn

CNH-260B, 260g/pc, 12pc/box, 4box/ctn

## Solid Fuel Tablets

**Product Features**

**Quick to Boil**  
A small amount of solid fuel tablets can boil water in a few minutes.

**Potable**  
This is no liquid fuel to leak, which makes it easy to carry in a pocket, backpack, or emergency preparedness kit.

**Smokeless and Residue Free**  
Virtually smokeless and residue-free, fuel burns without sparks, do not liquefy and leave almost no ash.

**Easy to Light**  
Simply pop the solid fuel tablets out of the water-proof packaging, place in the tray of your stove, and easily light with a match or lighter.

## | Canahot Tealight Candle

## | Canahot Tealight Candle

Tealight Candle, also known as a “night light”, is a small candle set inside an aluminum cup allowing the candle to pull and liquefy. These Candles are one of the most commonly acquired candles with a multitude of uses. Be it Home Decoration, Birthday Parties, Special Events, Restaurants, Churches, Spas or Hotels. Tealights can be found everywhere!

Tealight is made of pure wax, with soft aluminum cup which can protect our skin from being hurt. It's smokeless, smellless, and innocuous during burning.
